To enable HID and Smart phone modes scan the following barcodes.

2. BT HID mode

1. Start of Configuration

3. Smart phone mode

4. End Of Configuration

Wireless Handheld Gun Type Scanner

Quick Connection Guide

Version 1.00

Connecting with iPad *Connect scanner with iPad or iPhone*

Please follow the below instructions carefully to pair the scanner with your iPad.

Step. 1

Press and hold the trigger for 2 seconds to power on the scanner and use the barcodes in [Setting up the scanner](#) to enable HID and Smart phone modes if necessary. Steady blue LED flashing indicates the scanner is wireless ready.

Press and hold trigger →

Blue flashing 0.5 second interval

Step. 2

On your iPad, go to Settings -> General -> Bluetooth to enable Bluetooth function on your iPad.

Step. 3

Once enabled you will see the scanner listed (shown as "ZBBT") on your iPad as picture below. Select "ZBBT" to connect to the scanner.

Step. 4

You will be prompted to enter a pairing "PIN code" as shown in the following screen.

Step. 5

Use the [ASCII Code 39 Table](#) to scan the pin code using the scanner and scan "Enter" to confirm the entry. You should hear 2 short beeps indicating the scanner is connected. Please complete the scanning within 30 seconds.

In this case, for example, scan 3, 2, 7, 6, then scan Enter in ASCII table.

Step. 6

Once connected, you will see ZBBT listed as "Connected" on your iPad's Device list. You are now ready to scan!

Note

The procedure to pair scanner with iPhone is identical to iPad. Simply follow the above procedure carefully and replace iPad with iPhone as appropriate.
